

Van Beest has added a new type of identification TAG to the program: forged tags for grade 8 and grade 10 slings.

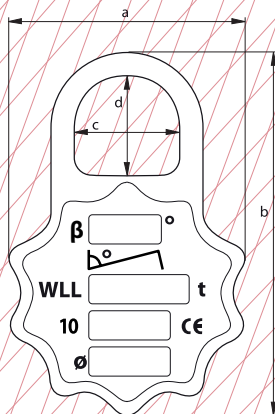

Forged tags are durable and ideal for the roughest working conditions.

A sling shop can mark the tag with angles applicable, WLL of the sling, the number and length of legs, diameter of the chain, and the name of sling manufacturer etc. The grade is already premarked.

Please find herewith the latest Van Beest product information.
