

EXCEL[®]

Grade 10 !!

Product Update

UMJ

Van Beest has recently finished development of the latest addition to the Excel grade 10 range: grade 10 connecting links. These links allow for easy connection of chains to master links or eye hooks.

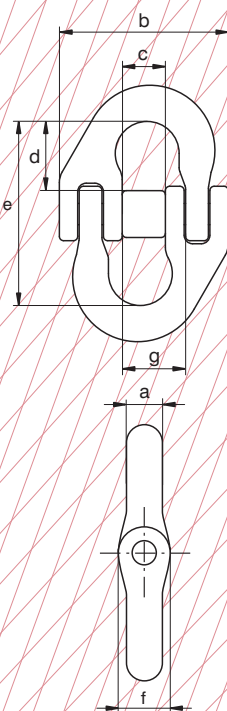

Connecting links are designed for easy and quick assembly. However we supply them unassembled to avoid having to disassemble prior to use, which saves time. They are suitable for lifting purposes, with a safety factor of four times the working load limit. Each connecting link has the manufacturer's symbol, the batch code, the steel grade, the CE conformity code and FRANCE (origin) marked in the body.

Van Beest offers a complete program of wire rope- and chain fittings. This latest addition will complete our range of grade 10 connectors. We now offer three types of links; omega-, pear shape- and connecting links.

Please find herewith the latest Van Beest product information including details of these connecting links. For more information please contact us: sales@vanbeest.com

EXCEL[®] Connecting link, grade 10

- **Material** : alloy steel, grade 10, quenched and tempered
- **Safety factor** : MBL equals 4 x WLL
- **Finish** : painted blue
